

ELCOMSOFT

Product Catalog 2011

Password Validation and Password Recovery

Established in 1990, ElcomSoft Co. Ltd (referred hereafter as ElcomSoft) is a privately owned software company headquartered in Moscow, Russia. ElcomSoft specializes in Windows productivity applications for businesses and end users.

Password protection of confidential documents is becoming an ever more important part of day-to-day life for businesses and end users alike. Losing or forgetting a password without means of recovery interferes with the office workflow and causes substantial damage.

ElcomSoft's award-winning password recovery software uses powerful algorithms that are being constantly enhanced, allowing businesses and end users to continue using their valuable data.

ElcomSoft is a **Microsoft Gold Certified Partner** and a member of the **Intel® Software Partner Program**, a member of the **Russian Cryptology Association (RCA)**, **Computer Security Institute**, and a lifetime member of the **Association of Shareware Professionals (ASP)**.

ElcomSoft is proud of its achievements. We endeavor to improve our existing products while researching and developing new and exciting ones. We provide professional, helpful, and responsive replies to enquires and any software related questions.

Elcomsoft Password Recovery Bundle

The complete suite of ElcomSoft password recovery tools allows corporate and government customers to unprotect disks and systems and decrypt files and documents protected with popular applications. Based on in-house tests as well as feedback from ElcomSoft valuable customers, these password recovery tools are the fastest on the market, the easiest to use and the least expensive.

Innovative Technologies

ElcomSoft has pioneered many software innovations that have made it easier to recover lost passwords from the operating system, Microsoft Office products, Adobe PDF files, ZIP and RAR archives, and a variety of other applications. The latest development revolutionizes the speed of password recovery without requiring expensive hardware.

Unprecedented Speed

Certain ElcomSoft password recovery applications employ a revolutionary, patent pending technology to accelerate password recovery when a compatible NVIDIA graphics card is present in addition to the CPU-only mode. Currently supporting all GeForce8 boards, the GPU acceleration technology offloads parts of computational-heavy processing onto the fast and highly scalable processors featured in the NVIDIA's latest graphic accelerators.

Fifty Times Faster than Competitors

The GPU acceleration is patent pending and unique to ElcomSoft password recovery products, making password recovery up to 50 times faster compared to traditional password recovery methods that only use the computer's main CPU.

Instant Recovery

Elcomsoft Password Recovery Bundle is capable of instantly recovering passwords for a wide range of business and office applications, text processors, spreadsheets, database management programs, office suites, email clients, instant messengers, etc. Over a hundred different file formats and types of password encryption methods can be recovered instantly.

Competitive Pricing

Elcomsoft Password Recovery Bundle is priced competitively as compared to ordering ElcomSoft products separately. Volume discounts are available. The Competitive Upgrade policy makes it possible to obtain Elcomsoft Password Recovery Bundle as an upgrade of a competitive password recovery suite (contact us for detailed information).

System and Security Software

ElcomSoft provides administrators and security specialists with efficient password recovery, system and security tools that are designed to allow Windows 2000, Windows XP, Windows Server 2003, Windows Vista, Windows 7 and Windows Server 2008 system administrators to optimize the strength of protection in business networks and recover Windows system data efficiently.

Proactive Password Auditor

Proactive Password Auditor helps network administrators to examine the security of their networks by executing an audit of account passwords. By exposing insecure passwords, Proactive Password Auditor demonstrates how secure a network is under attack.

- Determine how secure your corporate network is
- Recover account passwords
- Perform attacks with brute force, by the dictionary, or with a mask from inside or outside of your network
- Recover up to 95% of passwords in just minutes

Examine Network Security

A single weak password exposes your entire network to an external threat. **Proactive Password Auditor** examines the security of your network by attempting to break into the network. It tries common attacks on the account passwords in an attempt to recover a password of a user account.

Proactive Password Auditor allows carrying out a password audit within a limited period of time. If it is possible for Proactive Password Auditor to recover a password within a reasonable time, the entire network cannot be considered secure.

Recover Account Passwords

Network administrators can use Proactive Password Auditor to recover Windows account passwords, too. Proactive Password Auditor analyzes user password hashes and recovers plain-text passwords, allowing accessing their accounts, including EFS-encrypted files and folders.

Obtain 95% of Passwords in Just Minutes

Proactive Password Auditor uses several basic methods for testing and recovering passwords, including brute force attack, mask attack, dictionary search, and Rainbow table attack. The Rainbow attack is particularly effective. It uses pre-computed hash tables that allow finding up to 95% of passwords in just minutes, instead of days or weeks. Fortunately, the Rainbow attack cannot be performed from outside of your network!

*More information on **Proactive Password Auditor**:*

Elcomsoft Distributed Password Recovery

Break complex passwords, recover strong encryption keys and unlock documents in a production environment.

Elcomsoft Distributed Password Recovery is a high-end solution for forensic and government agencies, data recovery and password recovery services and corporate users with multiple networked workstations connected over a LAN or the Internet. Featuring unique acceleration technologies and providing linear scalability with no overhead, Elcomsoft Distributed Password Recovery offers the fastest password recovery by a huge margin, and is the most technologically advanced password recovery product currently available.

Features and Benefits

- Multi-GPU support to recover up to 1 billion passwords per second
- Multiprocessor/ Multicore configurations for 16 times faster calculations
- GPU acceleration (patent pending) with NVIDIA and ATI cards
- Linear scalability allows using up to 10,000 workstation without performance drop-off
- Distributed password recovery over LAN, Internet or both
- Console management for flexible control from any networked PC
- Schedule support for flexible load balancing
- Minimum bandwidth utilization saves network resources and ensures zero scalability overhead

Supported Applications and Document Formats

- Microsoft Word, Excel, PowerPoint, Money, OneNote
- OpenDocument (OpenOffice, StarOffice)
- PGP (disks, personal certificates, self-decrypting archives etc)
- Personal Information Exchange certificates (PKCS #12)
- Adobe Acrobat PDF
- Windows NT/2000/XP/2003/Vista/7/2008 logon passwords (LM/NTLM)
- Lotus Notes ID files
- MD5 hashes
- Oracle and UNIX users' passwords
- WPA-PSK passwords

Patent-Pending Technology: NVIDIA GPU Acceleration

Elcomsoft Distributed Password Recovery employs a revolutionary, patent pending technology to accelerate password recovery when a compatible NVIDIA graphics card is present. Currently supporting all GeForce 8/9/100/200/400 and ATI Radeon HD 4800 and 5000 series boards, the acceleration technology offloads parts of computational-heavy processing onto the fast and highly scalable processors featured in the latest graphic accelerators. The GPU acceleration is unique to Elcomsoft Distributed Password Recovery, making password recovery up to fifty times faster as compared to password recovery methods that only use the computer's main CPU. Support for Tableau TACC1441 hardware accelerators is also included.

Elcomsoft Wireless Security Auditor

Elcomsoft Wireless Security Auditor allows network administrators to verify how secure a company's wireless network is by executing an audit of accessible wireless networks. Featuring patent-pending cost-efficient GPU acceleration technologies, Elcomsoft Wireless Security Auditor attempts to recover the original WPA/WPA2-PSK text passwords in order to test how secure your wireless environment is.

Features and Benefits

- Determine how secure your wireless network is
- Built-in wireless network sniffer (for *AirPCap* adapters)
- Test the strength of WPA/WPA2-PSK passwords protecting your wireless network
- Save time with patent-pending GPU acceleration technology when compatible NVIDIA or ATI video cards are present
- Run advanced dictionary attacks with highly configurable variations
- Perform attacks from inside or outside of your network

Wireless Network Security Audit

Elcomsoft Wireless Security Auditor examines the security of your wireless network by attempting to break into the network from outside or inside. Elcomsoft Wireless Security Auditor works completely in off-line, undetectable by the Wi-Fi network being probed, by analyzing a dump of network communications in order to attempt to retrieve the original WPA/WPA2-PSK passwords in plain text.

Elcomsoft Wireless Security Auditor allows carrying out a password audit within a limited time-frame. Representing state-of-the-art in password recovery, Elcomsoft Wireless Security Auditor is one of the fastest and most advanced tools for recovering Wi-Fi passwords. If Elcomsoft Wireless Security Auditor fails to recover a Wi-Fi password within a reasonable time, the entire wireless network can be considered secure.

GPU Acceleration

ElcomSoft has pioneered many software innovations that have made it easier to recover passwords protecting various types of resources. For the first time in the industry, the company's patent-pending GPU acceleration makes its way into Wi-Fi password recovery, reducing the time required to recover Wi-Fi passwords up to a hundred times. Supporting up to four NVIDIA boards such as GeForce 8, 9, 100, 200 and 400, as well as ATI video cards such as RADEON HD 4800 and 5000 Series, Elcomsoft Wireless Security Auditor allows building servers with supercomputer performance at a fraction of the price. Tableau TACC1441 accelerators are also supported.

Types of Attacks

Elcomsoft Wireless Security Auditor performs an advanced dictionary search attack in order to expose weak passwords consisting of words and phrases in spoken languages. Allowing highly customizable mutations of ordinary dictionary words, Elcomsoft Wireless Security Auditor performs hundreds of mutations to each word in order to ensure the widest coverage.

Elcomsoft System Recovery

Up to 40% of support calls are related to forgotten passwords and locked logins. Recover or reset Windows system passwords easily and automatically! There is no need to format the disk or reinstall Windows. Just boot from the CD and unlock your system in a matter of minutes!

Elcomsoft System Recovery can reset account passwords instantly, while supporting full-scale attacks to recover the original passwords.

Features and Benefits

- Ready to boot with Windows PE (Preinstallation Environment) licensed from Microsoft
- Recovers or resets user and administrative passwords
- Unlocks and enables user and administrative accounts
- Assigns administrative privileges to any user account
- Resets or disables password expiry options
- Broad hardware compatibility and genuinely native FAT and NTFS support
- Genuine Windows GUI for convenient operation
- Supports Windows NT4, Windows 2000/XP, Windows 2003/2008 Server, Vista and Windows 7
- An option to dump hashed passwords from SAM/SYSTEM files or Active Directory database for further analysis and off-line password recovery
- Built-in drivers for third-party SATA, RAID, and SCSI adapters from Intel, NVIDIA, VIA, SiS, Adaptec, Promise, and LSI

Ready to Boot

Elcomsoft System Recovery comes ready to boot from a CD, and makes it easy to create a bootable USB Flash Drive. No need to create a bootable disc and no need to reach for a Windows setup disks to make one! ElcomSoft has licensed the Windows Preinstallation Environment (Windows PE) directly from Microsoft, allowing the company to distribute the completely working bootable Windows environment based on Windows Vista.

Immediate Assistance

Get a bootable CD by Express Mail or instantly download an ISO image for immediate assistance.

Easy to Operate

The Windows PE environment offers complete access to the familiar Windows graphical user interface. No command line scripts and no poor imitations of the Windows GUI!

Boot Elcomsoft System Recovery from a CD-ROM or USB Flash Drive and fix all of your password access problems throughout the system.

Advanced EFS Data Recovery

Advanced EFS Data Recovery decrypts the protected files, and works in all versions of Windows 2000, XP, 2003, Vista, Windows 7 and Windows Server 2008. The recovery is still possible even when the system damaged, is not bootable, or when some encryption keys have been tampered with.

Advanced EFS Data Recovery recovers EFS-encrypted data that becomes inaccessible because of system administration errors such as removing users and user profiles, misconfiguring data recovery authorities, transferring users between domains, or moving hard disks to a different PC.

Case Studies

Advanced EFS Data Recovery is a powerful data recovery tool that helps recovering the encrypted files under various circumstances.

- Deleted keys, even on reformatted drives decrypted with sector-level disk scanning
- EFS-protected disk inserted into a different PC
- Deleted users or user profiles
- User transferred into a different domain without EFS consideration
- Account password reset performed by system administrator without EFS consideration
- Damaged disk, corrupted file system, unbootable operating system
- Reinstalled Windows or computer upgrades
- Formatted system partitions with encrypted files left on another disk

Recovering Encrypted Files

Advanced EFS Data Recovery decrypts files protected with EFS quickly and efficiently. Scanning the hard disk directly sector by sector, Advanced EFS Data Recovery locates the encrypted files as well as the available encryption keys, and decrypts the protected files. The direct access to the file system allows Advanced EFS Data Recovery to recover encrypted files in the most difficult cases even if the disk with data is only available without a valid user account to login into system, or when some encryption keys have been tampered with.

Instant Access

With **Advanced EFS Data Recovery**, instant access to EFS-protected files is often possible. The product is well aware of the EFS encryption weakness present in Windows 2000, allowing quickest recovery of the encrypted files. Supplying a valid password to the user account (or a previously used password if the password has been reset by a system administrator, causing EFS-protected files to become inaccessible) or an account that serves as a data recovery agent (Administrator account by default) can often provide on-the-fly decryption of the protected files.

The Professional edition locates master and private keys in the deleted files as well, scanning the disk sector by sector and using patterns to locate the keys, allowing the recovery of re-formatted disks and overwritten Windows installations.

*More information on **Advanced EFS Data Recovery**:*

<http://www.elcomsoft.com/aefsdrr.html>

Proactive System Password Recovery

If the user can log in to Windows, **Proactive System Password Recovery** recovers many types of passwords instantly, while allowing highly customizable attacks to recover the rest. It can also display hidden system information such as Product ID and CD Key.

Advanced Attacks

Certain types of passwords that cannot be recovered instantly are attacked with advanced, highly customizable combinations of dictionary and brute-force attacks.

Many computer users protect different accounts with exactly the same passwords, or with slight variations of a single password. Proactive System Password Recovery automatically adds each password it discovers into a dictionary, quickly unlocking accounts protected with any of the previously recovered passwords and their variations. As many types of passwords are discovered instantly, the chances of unlocking other types of accounts in just minutes are very high.

Instant Recovery

- Windows 95/98/ME and NT4/2000 logon and auto-logon passwords
- Windows XP stored user passwords (multiple credentials)
- RAS and dial-up passwords
- .NET Passport password
- Passwords stored in Domain Cached Credentials
- Passwords to VPN (Virtual Private Network) connections
- Passwords and access rights to shared resources
- LSA Secrets
- Passwords hidden under the asterisks
- Product ID and CD Key for Windows and Microsoft Office installations

Fast Recovery with an Advanced Attack

- Windows NT/2000/XP/2003/Vista/7/2008 user passwords
- SYSKEY startup passwords
- Passwords stored in Domain Cached Credentials
- WPA-PSK passwords
- Remote assistance passwords
- Windows 9x passwords (from PWL-files)

Proactive System Password Recovery is not limited to retrieving passwords, and allows manipulating with user credentials and Registry files.

*More information on **Proactive System Password Recovery**:*

<http://www.elcomsoft.com/pspr.html>

Password Recovery Software

Our password recovery products support for about 100 widely used file formats and applications such as Microsoft Office, VBA, Microsoft Backup, Mail, Schedule+ and Internet Explorer as well as data compression utilities, Lotus SmartSuite components, Adobe Acrobat, and many more.

Advanced Archive Password Recovery

Recover protection passwords or unlocks encrypted ZIP and RAR archives created with all versions of popular archivers. Recover passwords for plain and self-extracting archives created with PKZip and WinZip, RAR and WinRAR automatically or with your assistance. Guaranteed unlocking of archives created with WinZip 8.0 and earlier in under one hour is possible by exploiting an implementation flaw.

Advanced Archive Password Recovery features ultimate compatibility among the various types of archives, knows weaknesses of certain types of protection, and provides best-in-class performance in unlocking all types of archives.

*More information on **Advanced Archive Password Recovery**:*

<http://www.elcomsoft.com/archpr.html>

Advanced Office Password Recovery

Unlock documents created with all versions of Microsoft Office from the ancient 2.0 to the modern 2010. Recover passwords for Microsoft Word, Excel, Access, Outlook, Project, Money, PowerPoint, Visio, Publisher, OneNote, Backup, Schedule+, and Mail. Reset MS Internet Explorer Content Advisor passwords and open any password-protected VBA project by exploiting a backdoor.

Instant Access to Password-Protected Documents

Not all passwords are equally strong. **Advanced Office Password Recovery** provides instant access to many types of password-protected documents, including those created in Microsoft Word and Excel versions 97 and 2000. Later versions of Microsoft Word and Excel save documents and spreadsheets in compatibility mode by default making them available for instant password recovery

To recover strong passwords for Office 2007/2010 documents, patent-pending GPU acceleration technology with NVIDIA or ATI video cards is available; allows up to 32 CPUs or CPU cores and up to 8 GPUs.

*More information on **Advanced Office Password Recovery**:*

<http://www.elcomsoft.com/aopr.html>

Advanced Office Password Breaker

Advanced Office Password Breaker unlocks documents created with Microsoft Office Word and Excel 97 and 2000, as well as documents saved with Microsoft Office XP and 2003 in Office 97/2000 Compatibility Mode.

Guaranteed Recovery

The recovery of a protected document is guaranteed regardless the password length and complexity. Typically, a modern dual-core PC unlocks documents in less than three days. With newly-added patented Thunder Tables® technology MS Word files recovery takes mere minutes.

Unlike competition, **Advanced Office Password Breaker** does not play the guessing game. Instead, it reaches deep to access low-level encryption keys that protect your documents. Surprisingly, Microsoft has chosen a weak 40-bit encryption to protect Microsoft Word and Excel documents. Attacking the low-level 40-bit encryption key instead of attempting to guess variable-length alphanumeric passwords guarantees positive results within a limited and reasonable timeframe.

*More information on **Advanced Office Password Breaker**:*

<http://www.elcomsoft.com/aopb.html>

Advanced PDF Password Recovery

Recover PDF passwords and instantly remove PDF restrictions. Get access to password-protected PDF files quickly and efficiently! Instantly unlock restricted PDF documents by removing printing, editing and copying restrictions! Advanced PDF Password Recovery recovers or instantly removes passwords protecting or locking PDF documents created with all versions of Adobe Acrobat or any other PDF application.

Features and Benefits

- Removes “owner” and “user” passwords
- Recovers passwords to open
- Supports 40-bit and 128-bit RC4 encryption, AES encryption
- High-speed low-level code optimized for multi-core CPUs
- NVIDIA GPU acceleration for Acrobat 9 password recovery
- Supports all versions of Adobe Acrobat
- Unlocks PDF documents with printing/copying/editing restrictions
- Thunder Tables® technology recovers 40-bit passwords in a matter of seconds
- Dictionary and brute-force attacks with user-defined masks and advanced templates

<http://www.elcomsoft.com/apdfpr.html>

Elcomsoft Phone Password Breaker

Gain access to password-protected BlackBerry, iPhone, iPad and iPod backups! Supporting all versions of BlackBerry and Apple smartphones released up to date, Elcomsoft Phone Password Breaker is the first GPU-accelerated password recovery tool to obtain original passwords protecting iPhone/iPod backups. Supporting multiple ATI and NVIDIA video cards, the new iPhone password recovery tool offers supercomputer performance at consumer prices.

*More information on **Elcomsoft Phone Password Breaker**:*

<http://www.elcomsoft.com/eppb.html>

Advanced SQL Password Recovery

Instantly replace or reset lost or forgotten user and administrator passwords protecting Microsoft SQL Server databases. No need to install Microsoft SQL Server to recover a password! Unlock password-protected databases from any PC. All you need to replace any user or administrative password is Advanced SQL Password Recovery and **master.mdf** file. Advanced SQL Password Recovery supports Microsoft SQL Server and Microsoft SQL Server Express 2000/2005/2008.

Advanced SQL Password Recovery will reset or replace passwords of any length and complexity, in any language and encoding. It operates instantly with no lengthy attacks or advanced settings.

*More information on **Advanced SQL Password Recovery**:*

Advanced WordPerfect Office Password Recovery

Regain access to password-protected Corel Office documents with Advanced WordPerfect Office Password Recovery quickly and automatically! Advanced WordPerfect Office Password Recovery quickly reveals passwords that protect documents created with Corel Office WordPerfect, Quattro Pro and Paradox with no lengthy attacks or advanced settings. Just run Advanced WordPerfect Office Password Recovery and click the “Open” button to get your password in a blink of an eye!

Advanced WordPerfect Office Password Recovery recovers passwords that protect documents created with all versions of Corel WordPerfect Office, and supports all of its protection modes. It recognizes and recovers passwords for WordPerfect (*.wp, *.wpd), QuattroPro (*.qpw, *.wb?, *.wq?), and Paradox (*.db) documents, as well as Corel WordPerfect Lightning account passwords.

*More information on **Advanced WordPerfect Office Password Recovery**:*

<http://www.elcomsoft.com/awopr.html>

Advanced Lotus Password Recovery

Advanced Lotus Password Recovery recovers passwords protecting documents created with all versions of IBM/Lotus SmartSuite on local and remote PCs. It recognizes and recovers passwords for Lotus Organizer, Lotus WordPro, Lotus 1-2-3, Lotus Approach, and Freelance Graphics documents, as well as FTP and proxy passwords set in Lotus SmartSuite components.

*More information on **Advanced Lotus Password Recovery**:*

<http://www.elcomsoft.com/alpr.html>

Advanced Intuit Password Recovery

Recover lost or forgotten passwords to Intuit Quicken, Quicken Lawyer and QuickBooks files, including multi-lingual and international versions.

Supported Products

- Quicken versions 4 through 2008
- QuickBooks versions 3 through 2008
- Most non-US versions of Quicken and QuickBooks

Note: in Quicken 2002 to 2007 and QuickBooks 2003 to 2007, the short passwords are recovered, and the longer passwords are instantly removed.

Supported File Formats

- Intuit Quicken (*.QDT, *.QDB, *.QDF)
- Quicken Lawyer (*.PFL, *.BFL)
- QuickBooks (.QBA, .QBW)

*More information on **Advanced Intuit Password Recovery**:*

<http://www.elcomsoft.com/ainpr.html>

Advanced Sage Password Recovery

View user and Admin passwords in Sage PeachTree Accounting and get instant access to password-protected ACT! documents - guaranteed! Recover or replace passwords protecting BLB, MUD and ADF/PAD files created with ACT! software suite locally or remotely. Advanced Sage Password Recovery instantly reveals passwords protecting documents saved by all versions of ACT!, and lists user and administrator passwords in Sage PeachTree Accounting.

More information on **Advanced Sage Password Recovery**:

<http://www.elcomsoft.com/asapr.html>

Advanced Mailbox Password Recovery

Recover Passwords to Email Accounts and Profiles

Advanced Mailbox Password Recovery instantly retrieves the locally stored login and password information protecting email accounts and profiles, and supports many popular Microsoft and third-party email clients. With the help of the included POP3/IMAP Server Emulator, Advanced Mailbox Password Recovery retrieves passwords to POP3 and IMAP accounts from **all email clients** in existence.

Supported Email Clients

- Microsoft Internet Mail and News, Outlook Express
- Eudora, TheBat! and TheBat! Voyager
- Netscape Navigator/Communicator Mail
- Pegasus, Calypso, FoxMail, Phoenix Mail
- IncrediMail and @nyMail
- QuickMail Pro and MailThem
- Opera mail and Kaufman Mail Warrior
- Becky! and Internet Mail

More information on **Advanced Mailbox Password Recovery**:

<http://www.elcomsoft.com/ambpr.html>

Advanced Instant Messengers Password Recovery

Advanced Instant Messengers Password Recovery instantly retrieves the login and password information protecting user accounts in various instant messengers. Currently supporting over 70 different instant messengers, Advanced Instant Messengers Password Recovery is undoubtedly the most universal product in its class. If there is more than one account in the system, Advanced Instant Messengers Password Recovery recovers all passwords.

Supported Instant Messengers

Over 70 popular instant messengers are supported, including AIM, ICQ, Windows Live! and MSN Messengers, Yahoo!, Miranda, Trillian, and many more. Please visit ElcomSoft Web site for the complete list of supported products.

More information on **Advanced Instant Messengers Password Recovery**:
